WEEKLY 6/29 - 7/04

PREPAREDNESS

BioWatch- continued coordination activities. Began preparation of HQ monthly report by coordinating with regional personnel to retrieve EPA labor and travel cost that are necessary. Began drafting a short "what is EPA's role in disasters" section to include in the normal BW 101 presentation given to local and state officials.

NIT- prepared and distributed KLP workgroups with two co-leads. It is anticipated that the IMT KLP-trained and IMT proposed members prepare for activation by participating on their specific assigned workgroups and later as a team member if they are assigned to one of three IMTs. Drafted an list of common "items" and KLP-specific items for workgroups members to consider focusing on.

REMOVALS

Westbank Asbestos Site - received a voicemail from a Louisiana congressional office regarding a resident on the westbank of New Orleans. Coordinating response with External Affairs.
